

INVITATION

LUNCHEON & AWARDS PRESENTATION

EAST-WEST GATEWAY
Council of Governments

Creating Solutions Across Jurisdictional Boundaries

The East-West Gateway Council of Governments
cordially invites you to attend our
52nd Annual Meeting Luncheon
and presentation of the
Outstanding Local Government Achievement Awards

noon until 1:30 pm
Friday, November 17, 2017

You are also invited to discuss and learn about
"Technology in Motion"
in a morning session before the luncheon at

The Hilton St. Louis at the Ballpark
One South Broadway, downtown St. Louis

Before the luncheon, join us for a morning session featuring
Technology in Motion and a closing panel discussion.
See details inside.

See inside for details. No charge for the morning session.

EAST-WEST GATEWAY
Council of Governments

Creating Solutions Across Jurisdictional Boundaries

The Annual Meeting and Awards Ceremony—noon until 1:30 p.m.

All local governments in the city of St. Louis and the surrounding seven-county, bi-state region are members of the East-West Gateway Council of Governments.

The annual meeting is a time when the full membership comes together.

During the luncheon and awards program, the East-West Gateway Board of Directors will honor local governments and individuals for their outstanding achievements in public service.

The charge for the luncheon and awards ceremony is \$60 per person or \$570 for a table of ten. Please use the enclosed form to register, or register on-line at www.ewgateway.org

Annual Meeting Morning Session: *Technology in Motion*

9-11 a.m.

Recent advancements in **transportation technology** could potentially impact all modes of travel in the St. Louis Region, as well as the Region's economy. It is important for local and state agencies to understand what emerging transportation technology will mean to them and what potential strategies exist to assist in deployment of the technology within the St. Louis Region. Similarly, the Council needs to identify the potential impacts of technology on the Region's transportation infrastructure and take steps to integrate it into the Council's transportation planning processes.

The session will include **presentations and a panel discussion** involving Council staff, as well as national and state experts in transportation technologies.
