## Definition

Percent of residents living in poverty

## Why is it Important?

Addressing poverty is a critical issue for a sustainable society. Residents living in poverty have a decreased quality of life which may include a day to day struggle for food and shelter. Poverty reduces the ability of residents to afford health care, higher education, and other necessities. Poverty also impacts the rest of society by increasing the need for government assistance, and reducing the ability of governments and nonprofits to meet societal needs.

## How are we Doing?

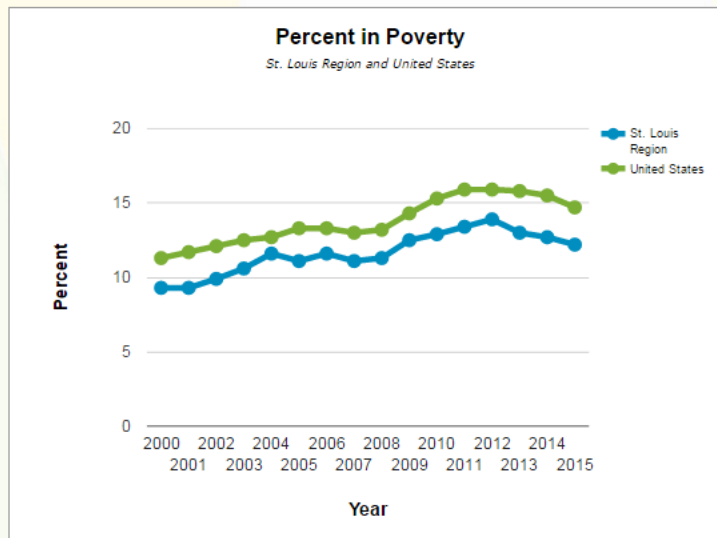

The poverty rate in the St. Louis region was 12.2 percent in 2015, essentially the same as it was in 2010, when 12.9 percent of the region's residents were in poverty and about the same as in 2014 (12.7 percent). In 2015 the poverty threshold for a family of four was \$24,257.<sup>1</sup>An estimated 316,000 individuals live below the poverty level in the 8-county St. Louis region. By county in the region, poverty rates range from 5.0 percent in Monroe County to 25.5 percent in the city of St. Louis.

Black individuals in the St. Louis MSA are more than three times as likely to be in poverty as white individuals. In 2015, 27.8 percent of black individuals in St. Louis were in poverty compared to 8.0 percent of white individuals. Between 2000 and 2012, the poverty rate in St. Louis increased almost every year, with an overall increase of 4.6 percentage points. In 2000, the rate was 9.3 percent and in 2012, it was 13.9 percent. From 2012 to 2015, the rate declined annually to 12.2 percent, about the same as it was in 2009. The rate for the United States followed a similar trend, increasing to a height of 15.9 percent in 2011 and 2012. In 2015, the St. Louis MSA ranked 36<sup>th</sup> among the 50 peer regions with a lower poverty rate than many of the peers and a rate 2.5 percentage points lower than the United States.

# 2017 OneSTL Activities

## Regional Sustainability Summit

- ❑ *April 5, 2017*
- ❑ *Eric P. Newman Education Center at Washington University*
- ❑ *More than 300 attendees*
- ❑ *More than 100 organizations*
- ❑ *Was momentum to create Sustainability Lab and OneSTL Working Groups*

## OneSTL Working Groups

- ❑ *Helps focus activities*
- ❑ *Led by partners*
- ❑ *Action oriented*
- ❑ *[www.onestltargets.org](http://www.onestltargets.org)*

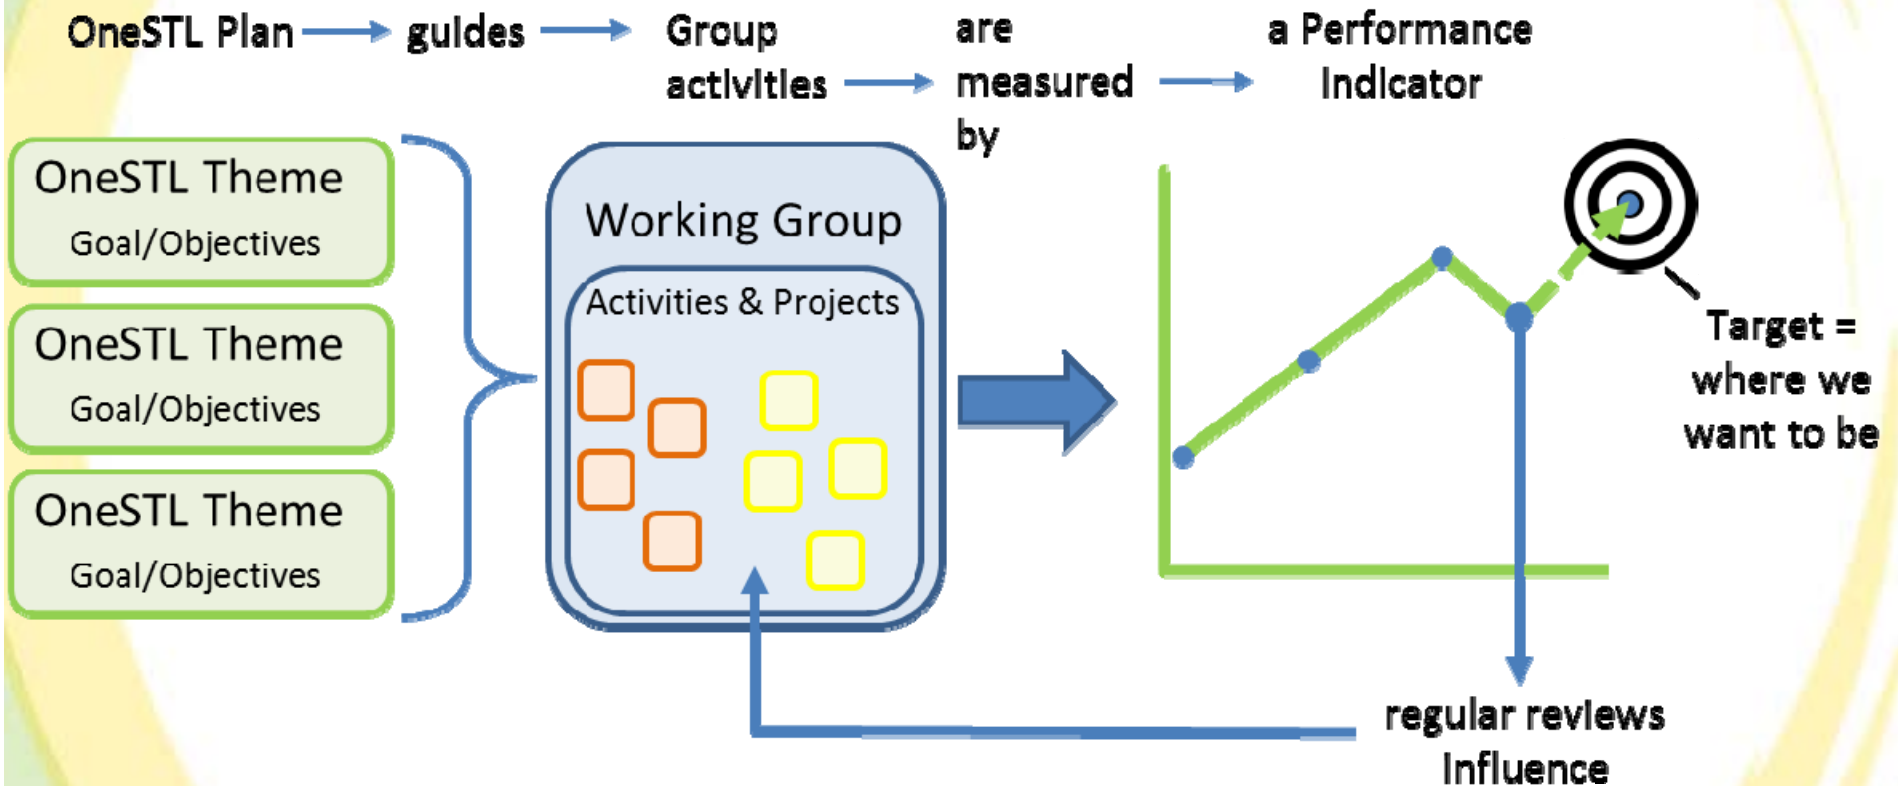

## Sustainability Lab @ T-Rex

- ❑ *T-Rex is a new link to technology sector*
- ❑ *Monthly event, more than 350 attendees in 2017*
- ❑ *Recurring content on food access, energy equity, and sustainability in business*
- ❑ *Informational topics such as Road to Tomorrow, EcoVillages and Media Literacy*

# OneSTL Working Groups

# WATER AND GREEN INFRASTRUCTURE

Target = 100% of land in STL Region has active organizations and quality watershed plans in progress by 2025/plans completed by 2030.

# MATERIALS AND RECYCLING

Target = Reduce tonnage of waste going to landfills within our watershed by 30% by 2030 over a 2015 baseline.

## Activities

- Maintain database of regional water quality efforts
- Maintain resources on water quality, best management practices, and watershed planning
- Produce informational videos such as Labarque Creek restoration

## Activities

- Create Waste Diversion Ambassadors
- Create a central, regional database and website for information on recycling and hard-to-recycle items
- Conduct a regional public outreach and education campaign on recycling

# TRANSIT ORIENTED DEVELOPMENT

Target = By 2023, increase the number of destinations such as jobs, residences, and other resources or amenities within a 1/4 mile or five minute safe and accessible walk by 30 percent at 20 stations from a 2018 baseline.

## Activities:

- Define local context and definition of transit-oriented development
- Develop a process to measure and assess stations and station areas

Planning and Urban  
Design Agency

Saint Louis  
**COUNTY**  
Department of Planning

# ENERGY AND EMISSIONS

Target = Reduce greenhouse gas emissions by 28% by 2025 and 80% by 2050 (2005 baseline).

## Activities:

- Seek public and private endorsements
- Support those institutions as they strive to meet their own goals
- Create a regional Greenhouse Gas Inventory
- Form sub-committees based on results of the Inventory (i.e. building efficiency, transportation efficiency, and energy source)

Missouri  
Gateway  
CHAPTER

# FOOD ACCESS

Target = By 2027, reduce by half the number of census tracts where residents are low-income, lack vehicle access, are a certain distance from a healthy food outlet, and availability of healthy food is low.

## Actions:

- Develop “alternative food retail models”
- Work with grocery stores to address community concerns
- Increase food production in North St. Louis
- Increase knowledge of healthy food

# BIODIVERSITY

Target = By 2025, 100% of counties in St. Louis region are using the Regional Biodiversity Atlas to actively guide their planning, policies and practices in ways that increase habitat connectivity, ecological functionality, and quality of life for all.

## Actions:

- Build a regional inventory of biodiversity data
- Develop a regional atlas of priorities
- Build community awareness and engagement around biodiversity
- Identify pilot projects to take action in the priority areas
