# Performance Measures and Targets

## Pavement and Bridge Condition

- Pavement
  - Percentage of pavements on the Interstate System in Good condition
  - Percentage of pavements on the Interstate System in Poor condition
  - Percentage of pavements on the non-Interstate National Highway System (NHS) in Good condition
  - Percentage of pavements on the non-Interstate NHS in Poor condition
- Bridge
  - Percentage of NHS bridges classified as in Good condition
  - Percentage of NHS bridges classified as in Poor condition

## System Reliability

- Percent of person miles traveled on the Interstate System that are reliable
- Percent of person miles traveled on the non-Interstate NHS that are reliable
- Truck Travel Time Reliability Index

## Environmental Sustainability/CMAQ

- Total emissions reduction (on-road mobile sources)

# Reporting

- MPOs must report baseline roadway transportation system condition and performance data and **progress toward the achievement of targets** to their respective state Departments of Transportation (DOT).
- States and MPOs' LRTPs must describe the performance measures and targets used to assess system performance, evaluate the performance of the transportation system with respect to the federally required performance targets, and **report on progress made.**
- State Transportation Improvement Programs (STIPs) and MPOs' TIPs must link investment priorities to the targets in their respective LRTPs and describe, to the maximum extent practicable, the **anticipated effect of the program toward achieving established targets.**
