To: Transportation Planning Committee

From: Staff

Date: February 1, 2019

Subject: Functional Classification Update

Functional classification is the process by which all roadways are grouped into classes according to the type of service they provide. The Federal Highway Administration (FHWA) requires the use of functional classification to determine eligibility for federal funding. There are three principal roadway classifications: arterial, collector, and local roads. To be eligible for Surface Transportation Block Grant – Suballocated (STP-S) funds, a roadway must be classified as a minor collector or higher in an urban area or a major collector or higher in a rural area.

In order to accurately reflect changes in land use and travel patterns, staff, along with the Missouri Department of Transportation (MoDOT) and the Illinois Department of Transportation solicits revision applications from member agencies semi-annually and conducts a full system review every three to five years. County and municipal officials submitted applications requesting functional class changes to East-West Gateway in May and November of 2018. Staff worked with MoDOT and local officials to prepare this update.

The applications were reviewed in the context of FHWA guidelines including mobility, accessibility, and connectivity. Staff also visited sites to verify conditions. Requested changes are recommended where it is deemed that a road’s current classification is no longer consistent with its function. In some cases, it was found that current conditions did not support a change in classification as requested.

At this time, a total of 11 changes in Missouri are recommended to the system. A list showing the recommended changes is included in this memo. A set of maps will be available at the TPC meeting. Once approved by the Board of Directors, the update will be sent to MoDOT headquarters for final review and subsequent submittal to FHWA for final approval.

Staff Recommendation:
Staff recommends adoption of the functional classification update for the St. Louis region as shown on the following pages.
