Date: October 1, 2021

Subject: Functional Classification Update

Functional classification is the process by which all roadways are grouped into classes according to the type of service they provide. The Federal Highway Administration (FHWA) requires the use of functional classification to determine eligibility for federal funding. There are three principal roadway classifications: arterial, collector, and local roads. To be eligible for Surface Transportation Block Grant – Suballocated (STP-S) funds, a roadway must be classified as a minor collector or higher in an urban area or a major collector or higher in a rural area.

In order to accurately reflect changes in land use and travel patterns, staff, along with the Missouri Department of Transportation (MoDOT) and the Illinois Department of Transportation (IDOT) solicits revision applications from member agencies semi-annually and conducts a full system review every three to five years. County and municipal officials submitted applications requesting functional class changes to East-West Gateway in May of 2021. Staff worked with MoDOT and local officials to prepare this update.

The applications were reviewed in the context of FHWA guidelines including mobility, accessibility, and connectivity. Requested changes are recommended where it is deemed that a road's current classification is no longer consistent with its function. Sometimes, current conditions do not support a change in classification as requested.

At this time, two changes in Missouri are recommended to the system. One application is not recommended because it does not meet the criteria for a change in classification at this time. A list showing the recommended changes is included in this memo. Once approved by the Board of Directors, the update will be sent to MoDOT headquarters for final review and subsequent submittal to FHWA for final approval.

Staff Recommendation:

Staff recommends adoption of the functional classification update as shown on the following pages.
