In the past, the lack of progress in developing and implementing projects using federal funds suballocated to the St. Louis region has led to significant project delays and created financial risks for both local and state transportation programs. Over the last several years, the East-West Gateway Council of Governments (EWGCOG) has taken a firm stance on delinquent projects through enforcement of the Council's Policy on Reasonable Progress.

Currently, there are 189 local projects in Missouri with federal funding programmed in Fiscal Year (FY) 2023 of the FY 2023-2026 Transportation Improvement Program (TIP). These projects, sponsored by 51 different agencies and representing \$137 million in federal funds, are subject to a September 30, 2023 deadline to obligate the federal funds, unless noted as receiving a schedule extension. To obligate funds, a sponsor must obtain approval from the Missouri Department of Transportation (MoDOT) for a specific milestone. Generally, a project must meet three milestones before construction or implementation of a project may begin: approval of design contract (PE), approval to acquire right-of-way (ROW), and final plan approval/authority to advertise (CONST/IMPL).

If a project is realizing delays that will put the federal funding at risk of forfeiture (i.e., not meet a September 30 deadline), the project sponsor will have the opportunity to request a "one-time extension" of their project schedule. The request for an extension is only available for projects with construction funds programmed in the current fiscal year and is due by June 1, 2023. One-time extensions of up to three (3) months may be granted by East-West Gateway staff and one-time extensions greater than three (3) months, but not more than nine (9) months, will go to the Board of Directors for their consideration and approval. If the project still cannot obligate funds after the one-time extension or the sponsor decides not to proceed, funding will be removed from the TIP, and the federal funds associated with those projects will be returned to the regional funding pool for redistribution without further action by the board.

In the past, the lack of progress in developing and implementing projects using federal funds suballocated to the St. Louis region has led to significant project delays and created financial risks for both local and state transportation programs. Over the last several years, the East-West Gateway Council of Governments (EWGCOG) has taken a firm stance on delinquent projects through enforcement of the Council's Policy on Reasonable Progress.

Currently, there are 184 local projects in Missouri with federal funding programmed in Fiscal Year (FY) 2023 of the FY 2023-2026 Transportation Improvement Program (TIP). These projects, sponsored by 50 different agencies and representing \$136 million in federal funds, are subject to a September 30, 2023 deadline to obligate the federal funds, unless noted as receiving a schedule extension. To obligate funds, a sponsor must obtain approval from the Missouri Department of Transportation (MoDOT) for a specific milestone. Generally, a project must meet three milestones before construction or implementation of a project may begin: approval of design contract (PE), approval to acquire right-of-way (ROW), and final plan approval/authority to advertise (CONST/IMPL).

If a project is realizing delays that will put the federal funding at risk of forfeiture (i.e., not meet a September 30 deadline), the project sponsor will have the opportunity to request a "one-time extension" of their project schedule. The request for an extension is only available for projects with construction funds programmed in the current fiscal year and is due by June 1, 2023. One-time extensions of up to three (3) months may be granted by East-West Gateway staff and one-time extensions greater than three (3) months, but not more than nine (9) months, will go to the Board of Directors for their consideration and approval. If the project still cannot obligate funds after the one-time extension or the sponsor decides not to proceed, funding will be removed from the TIP, and the federal funds associated with those projects will be returned to the regional funding pool for redistribution without further action by the board.

In the past, the lack of progress in developing and implementing projects using federal funds suballocated to the St. Louis region has led to significant project delays and created financial risks for both local and state transportation programs. Over the last several years, the East-West Gateway Council of Governments (EWGCOG) has taken a firm stance on delinquent projects through enforcement of the Council's Policy on Reasonable Progress.

Currently, there are 184 local projects in Missouri with federal funding programmed in Fiscal Year (FY) 2023 of the FY 2023-2026 Transportation Improvement Program (TIP). These projects, sponsored by 50 different agencies and representing \$136 million in federal funds, are subject to a September 30, 2023 deadline to obligate the federal funds, unless noted as receiving a schedule extension. To obligate funds, a sponsor must obtain approval from the Missouri Department of Transportation (MoDOT) for a specific milestone. Generally, a project must meet three milestones before construction or implementation of a project may begin: approval of design contract (PE), approval to acquire right-of-way (ROW), and final plan approval/authority to advertise (CONST/IMPL).

If a project is realizing delays that will put the federal funding at risk of forfeiture (i.e., not meet a September 30 deadline), the project sponsor will have the opportunity to request a "one-time extension" of their project schedule. The request for an extension is only available for projects with construction funds programmed in the current fiscal year and is due by June 1, 2023. One-time extensions of up to three (3) months may be granted by East-West Gateway staff and one-time extensions greater than three (3) months, but not more than nine (9) months, will go to the Board of Directors for their consideration and approval. If the project still cannot obligate funds after the one-time extension or the sponsor decides not to proceed, funding will be removed from the TIP, and the federal funds associated with those projects will be returned to the regional funding pool for redistribution without further action by the board.

In the past, the lack of progress in developing and implementing projects using federal funds suballocated to the St. Louis region has led to significant project delays and created financial risks for both local and state transportation programs. Over the last several years, the East-West Gateway Council of Governments (EWGCOG) has taken a firm stance on delinquent projects through enforcement of the Council's Policy on Reasonable Progress.

Currently, there are 183 local projects in Missouri with federal funding programmed in Fiscal Year (FY) 2023 of the FY 2023-2026 Transportation Improvement Program (TIP). These projects, sponsored by 50 different agencies and representing \$135 million in federal funds, are subject to a September 30, 2023 deadline to obligate the federal funds, unless noted as receiving a schedule extension. To obligate funds, a sponsor must obtain approval from the Missouri Department of Transportation (MoDOT) for a specific milestone. Generally, a project must meet three milestones before construction or implementation of a project may begin: approval of design contract (PE), approval to acquire right-of-way (ROW), and final plan approval/authority to advertise (CONST/IMPL).

If a project is realizing delays that will put the federal funding at risk of forfeiture (i.e., not meet a September 30 deadline), the project sponsor will have the opportunity to request a "one-time extension" of their project schedule. The request for an extension is only available for projects with construction funds programmed in the current fiscal year and is due by June 1, 2023. One-time extensions of up to three (3) months may be granted by East-West Gateway staff and one-time extensions greater than three (3) months, but not more than nine (9) months, will go to the Board of Directors for their consideration and approval. If the project still cannot obligate funds after the one-time extension or the sponsor decides not to proceed, funding will be removed from the TIP, and the federal funds associated with those projects will be returned to the regional funding pool for redistribution without further action by the board.

In the past, the lack of progress in developing and implementing projects using federal funds suballocated to the St. Louis region has led to significant project delays and created financial risks for both local and state transportation programs. Over the last several years, the East-West Gateway Council of Governments (EWGCOG) has taken a firm stance on delinquent projects through enforcement of the Council's Policy on Reasonable Progress.

Currently, there are 170 local projects in Missouri with federal funding programmed in Fiscal Year (FY) 2023 of the FY 2023-2026 Transportation Improvement Program (TIP). These projects, sponsored by 50 different agencies and representing \$133 million in federal funds, are subject to a September 30, 2023 deadline to obligate the federal funds, unless noted as receiving a schedule extension. To obligate funds, a sponsor must obtain approval from the Missouri Department of Transportation (MoDOT) for a specific milestone. Generally, a project must meet three milestones before construction or implementation of a project may begin: approval of design contract (PE), approval to acquire right-of-way (ROW), and final plan approval/authority to advertise (CONST/IMPL).

If a project is realizing delays that will put the federal funding at risk of forfeiture (i.e., not meet a September 30 deadline), the project sponsor will have the opportunity to request a "one-time extension" of their project schedule. The request for an extension is only available for projects with construction funds programmed in the current fiscal year and is due by June 1, 2023. One-time extensions of up to three (3) months may be granted by East-West Gateway staff and one-time extensions greater than three (3) months, but not more than nine (9) months, will go to the Board of Directors for their consideration and approval. If the project still cannot obligate funds after the one-time extension or the sponsor decides not to proceed, funding will be removed from the TIP, and the federal funds associated with those projects will be returned to the regional funding pool for redistribution without further action by the board.

In the past, the lack of progress in developing and implementing projects using federal funds suballocated to the St. Louis region has led to significant project delays and created financial risks for both local and state transportation programs. Over the last several years, the East-West Gateway Council of Governments (EWGCOG) has taken a firm stance on delinquent projects through enforcement of the Council's Policy on Reasonable Progress.

Currently, there are 172 local projects in Missouri with federal funding programmed in Fiscal Year (FY) 2023 of the FY 2023-2026 Transportation Improvement Program (TIP). These projects, sponsored by 49 different agencies and representing \$122 million in federal funds, are subject to a September 30, 2023 deadline to obligate the federal funds, unless noted as receiving a schedule extension. To obligate funds, a sponsor must obtain approval from the Missouri Department of Transportation (MoDOT) for a specific milestone. Generally, a project must meet three milestones before construction or implementation of a project may begin: approval of design contract (PE), approval to acquire right-of-way (ROW), and final plan approval/authority to advertise (CONST/IMPL).

If a project is realizing delays that will put the federal funding at risk of forfeiture (i.e., not meet a September 30 deadline), the project sponsor will have the opportunity to request a "one-time extension" of their project schedule. The request for an extension is only available for projects with construction funds programmed in the current fiscal year and is due by June 1, 2023. One-time extensions of up to three (3) months may be granted by East-West Gateway staff and one-time extensions greater than three (3) months, but not more than nine (9) months, will go to the Board of Directors for their consideration and approval. If the project still cannot obligate funds after the one-time extension or the sponsor decides not to proceed, funding will be removed from the TIP, and the federal funds associated with those projects will be returned to the regional funding pool for redistribution without further action by the board.

In the past, the lack of progress in developing and implementing projects using federal funds suballocated to the St. Louis region has led to significant project delays and created financial risks for both local and state transportation programs. Over the last several years, the East-West Gateway Council of Governments (EWGCOG) has taken a firm stance on delinquent projects through enforcement of the Council's Policy on Reasonable Progress.

Currently, there are 169 local projects in Missouri with federal funding programmed in Fiscal Year (FY) 2023 of the FY 2023-2026 Transportation Improvement Program (TIP). These projects, sponsored by 49 different agencies and representing \$120 million in federal funds, are subject to a September 30, 2023 deadline to obligate the federal funds, unless noted as receiving a schedule extension. To obligate funds, a sponsor must obtain approval from the Missouri Department of Transportation (MoDOT) for a specific milestone. Generally, a project must meet three milestones before construction or implementation of a project may begin: approval of design contract (PE), approval to acquire right-of-way (ROW), and final plan approval/authority to advertise (CONST/IMPL).

If a project is realizing delays that will put the federal funding at risk of forfeiture (i.e., not meet a September 30 deadline), the project sponsor will have the opportunity to request a "one-time extension" of their project schedule. The request for an extension is only available for projects with construction funds programmed in the current fiscal year and is due by June 1, 2023. One-time extensions of up to three (3) months may be granted by East-West Gateway staff and one-time extensions greater than three (3) months, but not more than nine (9) months, will go to the Board of Directors for their consideration and approval. If the project still cannot obligate funds after the one-time extension or the sponsor decides not to proceed, funding will be removed from the TIP, and the federal funds associated with those projects will be returned to the regional funding pool for redistribution without further action by the board.

In the past, the lack of progress in developing and implementing projects using federal funds suballocated to the St. Louis region has led to significant project delays and created financial risks for both local and state transportation programs. Over the last several years, the East-West Gateway Council of Governments (EWGCOG) has taken a firm stance on delinquent projects through enforcement of the Council's Policy on Reasonable Progress.

Currently, there are 167 local projects in Missouri with federal funding programmed in Fiscal Year (FY) 2023 of the FY 2023-2026 Transportation Improvement Program (TIP). These projects, sponsored by 49 different agencies and representing \$120 million in federal funds, are subject to a September 30, 2023 deadline to obligate the federal funds, unless noted as receiving a schedule extension. To obligate funds, a sponsor must obtain approval from the Missouri Department of Transportation (MoDOT) for a specific milestone. Generally, a project must meet three milestones before construction or implementation of a project may begin: approval of design contract (PE), approval to acquire right-of-way (ROW), and final plan approval/authority to advertise (CONST/IMPL).

If a project is realizing delays that will put the federal funding at risk of forfeiture (i.e., not meet a September 30 deadline), the project sponsor will have the opportunity to request a "one-time extension" of their project schedule. The request for an extension is only available for projects with construction funds programmed in the current fiscal year and is due by June 1, 2023. One-time extensions of up to three (3) months may be granted by East-West Gateway staff and one-time extensions greater than three (3) months, but not more than nine (9) months, will go to the Board of Directors for their consideration and approval. If the project still cannot obligate funds after the one-time extension or the sponsor decides not to proceed, funding will be removed from the TIP, and the federal funds associated with those projects will be returned to the regional funding pool for redistribution without further action by the board.
